I am a full stack web developer. I am dedicated to crafting cutting-edge full-stack solutions, demonstrating a firm grasp of technologies like Next.js, Node.js, React. My commitment to continuous learning is fueled by my ongoing education and the dynamic tech environment, driving me towards creating software that truly makes a difference. I love working on a challenging and innovative project with a great team. I have been working in fields like UI development, API development, testing and integration and others. Quality, scalability, and efficiency magic are my specialties.

## Recent Projects

### Full Stack Developer, [Ecommerce platform](#)

This is a backend-intensive e-commerce website that I built as a side project. It includes features commonly found in advanced e-commerce platforms. I developed it using the MERN tech stack, Redux, ShadCN UI, Lucid React, Tailwind CSS, Cloudinary, Multer, and the PayPal REST SDK.

Features:

- Fully responsive design.
- Filtering options by categories and brands.
- Search functionality.
- Sorting options by name and price.
- Admin page with CRUD operations for products and order management.
- PayPal payment mechanism.

### Frontend Developer, [Admin Dashboard](#)

The admin dashboard is a personal project which I built by react using the powerful UI library syncfusion.

Features:

- responsive
- dark and light mode
- theming option
- different charts
- search capabilities
